WISH Wineshow Online Entry System

Customisable online system to allow exhibitors to enter wines to a Wineshow

Prebuilt web system saves development complications

Concentrate on the show, not the web

Exhibitors encouraged to submit entries electronically

Eliminates data entry

Rely on outstanding support

Built by WISH and web experts

WISH Online Entry System reduces costs and eliminates the need to get a web company to build a single system

- Tight integration provides for the simple importing of Exhibitor Details and Entries from the dedicated WISH Online Entry system into the WISH Judging system database.
- The web system allows Exhibitors to provide their details, and all details of Class Entries, as set out on the Wineshow Regulations and Entry Sheets.
- Exhibitors can optionally be prequalified and Exhibitor details presented for confirmation or amendment.
- Entries are checked for suitability for their nominated Classes according to regulations.
- Exhibitors can revisit their details and exhibits using a provided PIN to make changes.
- Payments can be received by Cheque, Credit Card or Direct Deposit. Emails provide confirmation details.
- Credit Card payment facilities require a current payment gateway subscription, such as eWay.
- The regional website simply links to the dedicated WISH Online Entry system.
- The WISH Online Entry system operates with secure pages. Pages appear with addressing such as 'limestone.wineshows.org.au' or 'barossa.wineshows.org.au'
- Wineshow Committee members liaise directly with Jelka Software or Michael Major Media as appropriate.
- The management, hosting, security and functionality of the WISH Online Entry system is entirely the responsibility of Jelka Software and Michael Major Media.
